American Egg Board

Value-added products

Egg products are available in a multitude of convenient, value-added and precooked forms, offering manufacturers flexibility in creating ready-to-heat packaged items that require consistency and portion control. Many types of egg products can be customized to include the addition of other ingredients, including herbs, spices, cheeses and diced vegetables. Sometimes they will contain other ingredients to maintain product quality and assist with freeze-thaw stability.

Applications

Convenience items such as sandwiches, burritos and bowl meals, plus salad components

Storage & handling

Keep refrigerated or frozen according to egg product type and use well within expiration dates.
