**Standardized Recipe Form**

**Recipe Name:** Oatmeal Pancakes  
**Category:** Breakfast  
**Recipe #:** J-80 (i.e., entrée, breads)  
**HACCP Process:**  
- 1 – No Cook  
- 2 – Cook & Same Day Serve  
- 3 – Cook, Cool, Reheat, Serve  
- 4 – SOP Controlled

### Ingredients

</table>

**Directions:** Include **step by step instructions**, the **critical control points** (**CCP**-specific points at which a hazard can be reduced, eliminated or prevented) and **critical limit** (time and/or temperature that must be achieved to control a hazard).

- Mix dry ingredients together. Mix wet ingredients together. Combine the 2.
- Use a ¼ cup spoodle
- Makes 84 pancakes.
- Cook sausage & egg patty and hot hold at 135 or higher
- Grill pancakes & hot hold at 135 or higher
- Assembly: Fold pancake in half, inside place a ½ sausage patty and ½ egg patty

### Oven Temperature & Baking Time:

STANDARDIZED RECIPES

A standardized recipe is a recipe that has been tried, tested, evaluated and adapted for use by a food service. It produces a consistent quality and yields every time when the exact procedures, equipment and ingredients are followed.

Steps:

- Prepare a recipe to be standardized and test it until a high-quality product is produced.
- Write the recipe to include the name, exact ingredients and quantities on a standardized recipe form or any other format that is used in your food service. Weight is a more accurate measurement than volume and should be used when a scale is available.
- List step-by-step instructions for preparation and cooking, including equipment, oven temperature and cooking time. Include Critical Control Points (CCPs) including critical limits (time and temperature) as appropriate for the Hazard Analysis and Critical Control Points (HACCP) process chosen. Also include final product temperature (if not a CCP) as a part of the recipe.
- Include the yield and portion size on the recipe. Record the serving utensil to be used. You may find the yield and servings by measuring and counting the actual servings made from the recipe.
- Provide information on how the product meets the meal pattern requirement for your menu planning options. The nutrient analysis is only necessary for nutrient-based menu planning or if it is available.
- Adjust the recipe to correct the yield (number of servings) needed for each preparation/service area.
- Conduct a taste testing with staff to judge the appearance, texture, flavor and overall acceptability of the product. Instruct staff on the importance of following the recipe accurately and consistently.
- Re-adjust recipe as needed so that it yields a consistent product that students like. File in your recipe file and use as needed.
